

Using MUMS to send group of Text Messages

- Setup your individuals using 3rd email address as their phone text address.
 - For example if phone number is 888-111-2222 and their carrier is Verizon the email would be 8881112222@vtext.com. Other carriers have different addresses.
- Then in MUMS under Reports, use the Build Email List feature
 - Select 3rd Email Address
 - Select the group you want to send to
